

# Cabling & Wireless Services

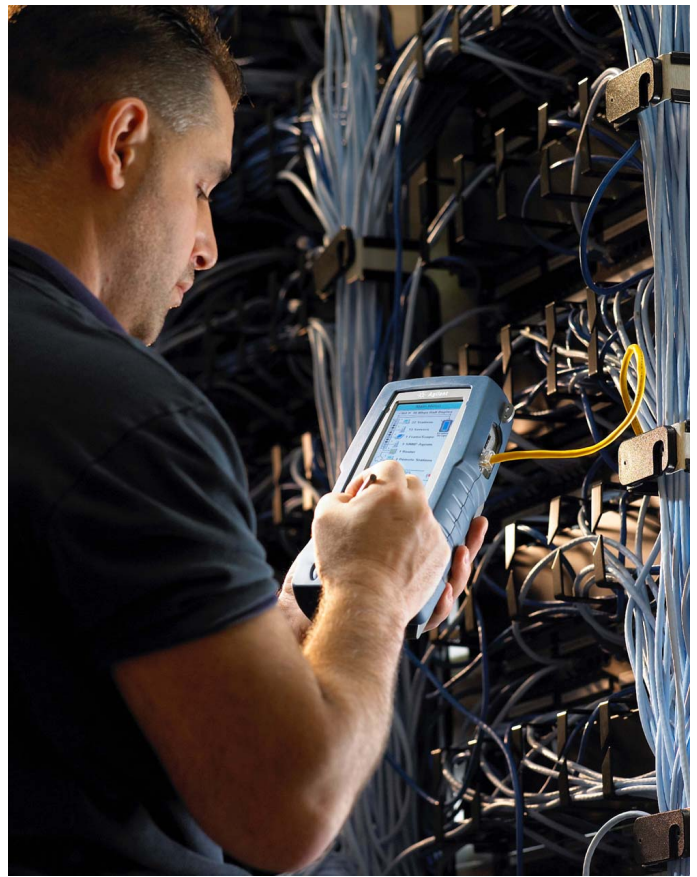

Your cabling system is the foundation that transparently runs all your business applications.

The Brigholme team of experts has extensive experience in designing, installing and managing projects of all sizes. Having worked in both traditional ceiling space as well as Raised Access Flooring environments, our experts ensure the job gets done right, securing your physical infrastructure investment.

We supply and install Twisted Pair and Fiber Optic cable as well as Wireless Point-to-Point, Multi-Point and Internal Access Points. All installations are tested and certified to the latest industry standards.

Brigholme provides authorized installation services for:

- AMP/Tyco
- Leviton/Superior Essex
- Mohawk/CDT Hubbell
- The Siemon Company

## Consultative Approach

Our staff has the knowledge, experience and commitment to assist clients in making cost-effective decisions on cabling infrastructure and service requirements. Our dedication to innovative solutions and our commitment to the tradition of quality and client satisfaction have enabled Brigholme to build an impressive clientele in both the public and private sectors.

## Premises Cabling

Upon request Brigholme can provide a site survey to facilitate accurate quotes and provide assistance in designing a network to meet your needs. Installation of unshielded twisted pair (UTP) data cabling at a certified category 5e or 6, voice cabling or fiber optic cabling are just some of the services provided.

## Outside Plant

Our trained technicians provide outside installation services for UTP or fiber optic cabling in a campus environment covering both aerial and burial installations.

## Wireless

Line of site wireless communications has become a cost effective way to link remote buildings, provide roaming capabilities for users and provide wiring alternatives for hard to cable buildings and spaces. Brigholme has invested in providing trained technicians and engineers that can determine whether wireless is a viable solution for you.

## Maintenance

Brigholme offers a broad range of services addressing all your cabling needs including:

- Gigabit Validation
- Moves, Adds and Changes
- Network Re-certification
- On-Site Technical Representation
- Problem Resolution
- Project Management

## Standardized Installations

### BICSI Member
